HAS TSC

ALSO HAS A MOM WHO WAS RIGHT ABOUT THE PIANO LESSONS

BEYOND YOUR TUBEROUS SCLEROSIS COMPLEX WITH SUBEPENDYMAL GIANT CELL ASTROCYTOMA (SEGA), THERE’S YOU.

INDICATION
AFINITOR® (everolimus) Tablets and AFINITOR DISPERZ™ (everolimus tablets for oral suspension) are prescription medicines used to treat adults and children with a genetic condition called tuberous sclerosis complex (TSC) who have a brain tumor called subependymal giant cell astrocytoma (SEGA) when the tumor cannot be removed completely by surgery.

IMPORTANT SAFETY INFORMATION
Patients should not take AFINITOR or AFINITOR DISPERZ if they are allergic to AFINITOR or AFINITOR DISPERZ or to any of its ingredients. Patients should tell their health care provider before taking AFINITOR or AFINITOR DISPERZ if they are allergic to sirolimus (Rapamune®) or temsirolimus (Torisel®).

Please see Important Safety Information throughout.
**Click here** for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.

People shown are not actual patients.
Find out how AFINITOR or AFINITOR DISPERZ may help shrink subependymal giant cell astrocytoma (SEGA) tumors in TSC.

IMPORTANT SAFETY INFORMATION
AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) can cause serious side effects that can even lead to death. If patients experience these side effects, they may need to stop taking AFINITOR or AFINITOR DISPERZ for a while or use a lower dose. Patients should follow their health care provider’s instructions.

Please see Important Safety Information throughout. Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
You or your loved one may have tuberous sclerosis complex (TSC). But you also have the ability to be proactive about reaching your treatment goals. By staying focused and working with your care team, you can learn about your condition, understand your treatment, and ensure the best care possible.

AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) is approved to treat TSC-related brain tumors in patients who aren’t eligible for surgery. This brochure can help you learn more about AFINITOR, so that you can know what to expect during treatment.

Embrace your role in finding the right care.

IMPORTANT SAFETY INFORMATION
Serious side effects include:

**Lung or Breathing Problems:** In some patients, lung or breathing problems may be severe and can even lead to death. Patients should tell their health care provider right away if they have any of these symptoms: new or worsening cough, shortness of breath, chest pain, difficulty breathing, or wheezing.

Please see Important Safety Information throughout. **Click here** for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
Subependymal giant cell astrocytoma (SEGA) is a brain tumor that can develop in people with tuberous sclerosis complex (TSC), which is a genetic disease. This means that the genes inside the cells of a person with TSC do not function properly. In a series of complex actions, the genes send signals to growth factors, which stay switched on, causing benign (noncancerous) tumors to grow.

SEGAs usually develop during childhood or adolescence, but they can also occur in adults. Sometimes, SEGAs are not diagnosed until the tumor has caused other symptoms.

### UNDERSTANDING TSC

#### Without TSC

- **TSC1**
- **TSC2**
- **P**
- **mTOR**

_TSC1 and TSC2 make PROTEINS to control mTOR and control CELL growth._

#### With TSC

- **TSC1**
- **TSC2**
- **mTOR**

_Defective TSC1 and TSC2 do not make PROTEINS, resulting in uncontrolled CELL growth. When cells grow out of control, tumors can develop, including in the brain._

#### With TSC (with AFINITOR [everolimus])

- **TSC1**
- **TSC2**
- **mTOR**
- **AFINITOR**

_AFINITOR controls mTOR and reduces tumor cell growth._

IMPORTANT SAFETY INFORMATION

Serious side effects include:

**Infections:** AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) may make patients more likely to develop an infection, such as pneumonia, or a bacterial, fungal, or viral infection. Viral infections may include reactivation of hepatitis B in people who have had hepatitis B in the past. In some people these infections may be severe and can even lead to death. Patients may need to be treated as soon as possible. Patients should tell their health care provider right away if they have a temperature of 100.5°F or above, chills, or do not feel well. Symptoms of hepatitis B or infection may include the following: fever, chills, skin rash, joint pain and inflammation, tiredness, loss of appetite, nausea, pale stools or dark urine, yellowing of the skin, or pain in the upper right side of the stomach.

Please see Important Safety Information throughout. **Click here** for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.

Approximately 80% of people with TSC have brain complications and up to 15% develop SEGA.
AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) are once-daily prescription medicines used to treat adults and children with a genetic condition called tuberous sclerosis complex (TSC) who have a brain tumor called subependymal giant cell astrocytoma (SEGA), when the tumor cannot be removed completely by surgery.

IMPORTANT SAFETY INFORMATION

Serious side effects include:

Angioedema: Patients who take an angiotensin-converting enzyme (ACE) inhibitor medicine during treatment with AFİNİTOR or AFINITOR DISPERZ are at a possible increased risk for a type of allergic reaction called angioedema. Talk with your health care provider before taking AFİNİTOR or AFINITOR DISPERZ if you are not sure if you take an ACE inhibitor medicine. Get medical help right away if you have trouble breathing or develop swelling of your tongue, mouth, or throat during treatment with AFİNİTOR or AFINITOR DISPERZ.

Please see Important Safety Information throughout. Click here for full Prescribing Information for AFİNİTOR or AFINITOR DISPERZ, including Patient Information.
IMPORTANT SAFETY INFORMATION

Serious side effects include:

Kidney Failure: Patients taking AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) may develop kidney failure. In some people this may be severe and can even lead to death. Patients should have tests to check their kidney function before and during their treatment with AFINITOR or AFINITOR DISPERZ.

Delayed Wound Healing: AFINITOR or AFINITOR DISPERZ can cause incisions to heal slowly or not heal well. Call your health care provider right away if your incision is red, warm, or painful; if you have blood, fluid, or pus in your incision; if your incision opens up; or if your incision swells.

Please see Important Safety Information throughout. 
Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.

There’s more at AFINITOR.com/SEGA
AFINITOR SHRINKS SEGA TUMORS AND PREVENTS NEW ONES FROM GROWING

In a long-term study, AFINITOR® (everolimus) reduced the size of SEGA tumors, starting at 6 months and continuing through 5 years. The size of SEGA tumors was measured every 6 months in people taking AFINITOR.

As early as 6 months, 9 out of 28 people (32%) had their tumor shrink to half its size.*

At 5 years, 89% of people had no progression of their SEGA†

IMPORTANT SAFETY INFORMATION

Before taking AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension), tell your health care provider about all your medical conditions, including if you:

- Have or have had kidney problems
- Have or have had liver problems
- Have diabetes or high blood sugar
- Have high blood cholesterol levels
- Have any infections
- Previously had hepatitis B

*An additional 9 patients had a >50% reduction in their largest SEGA tumor between 1 to 4 years after initiating AFINITOR, including 3 patients who had regrowth of a tumor after surgery but before receiving AFINITOR.

†Progression is defined as a ≥25% increase in size of the largest tumor compared to its starting size.

Please see Important Safety Information throughout.

Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
AFINITOR SHRINKS SEGA TUMORS AND PREVENTS NEW ONES FROM GROWING (CONTINUED)

At 5 years
Over 80% of patients continued AFINITOR therapy

- Average length of treatment was 5.7 years (range: 5 months to 6.9 years)
- No patient developed new SEGA tumors on AFINITOR therapy

IMPORTANT SAFETY INFORMATION
Before taking AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension), tell your health care provider about all your medical conditions, including if you:

- Are scheduled to receive any vaccinations. You should not receive a live vaccine or be around people who have recently received a live vaccine during your treatment with AFINITOR or AFINITOR DISPERZ. If you are not sure about the type of vaccine, ask your health care provider.
- Have other medical conditions
- Are pregnant or could become pregnant. AFINITOR or AFINITOR DISPERZ can cause harm to your unborn baby. If you are able to become pregnant, you should use effective birth control while using AFINITOR or AFINITOR DISPERZ and for 8 weeks after your last dose. Talk to your health care provider about birth control options while taking AFINITOR or AFINITOR DISPERZ.
- Are breastfeeding or plan to breastfeed. Do not breastfeed during treatment and for 2 weeks after your last dose.

Please see Important Safety Information throughout. 
Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
AFINITOR SHRINKS SEGA TUMORS AND PREVENTS NEW ONES FROM GROWING (CONTINUED)

In this 4-year study, AFINITOR® (everolimus) reduced SEGA tumors, starting at 6 months and continuing for about 4 years. A total of 111 patients (78 patients received AFINITOR and 33 patients received placebo) participated in the study. The size of the SEGA tumor was measured every 6 months in patients taking AFINITOR.

As early as 6 months, 35% had their tumor shrink to half its size.

At 4 years,
58% of people had their SEGA tumor reduced by half

- Average length of treatment was about 4 years (range: 0.2 to 4.9 years)

IMPORTANT SAFETY INFORMATION
Tell your health care provider about all of the medicines you take, including prescription and nonprescription medicines, vitamins, and herbal supplements. Using AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) with certain other medicines can cause serious side effects. Keep a list of medicines you take and show it to your health care provider when you get a new medicine.

Please see Important Safety Information throughout.
Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
AFINITOR SHRINKS SEGA TUMORS AND PREVENTS NEW ONES FROM GROWING (CONTINUED)

No patient needed surgery for SEGA during the 4-year study

IMPORTANT SAFETY INFORMATION
Especially tell your health care provider if you take St John’s wort (Hypericum perforatum), medicines that weaken your immune system (your body’s ability to fight infections and other problems), or medicines for:

• Fungal infections
• Bacterial infections
• Tuberculosis
• Seizures
• HIV-AIDS
• Heart conditions or high blood pressure

If you are taking any medicines for the conditions listed above, your health care provider might need to prescribe a different medicine or your dose of AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) may need to be changed. Tell your health care provider before you start taking any new medicine.

Please see Important Safety Information throughout.
Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
IMPORTANT SAFETY INFORMATION (continued)

Common Side Effects:
Common side effects include mouth ulcers. AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) can cause mouth ulcers and sores. Tell your health care provider if you have pain, discomfort, or open sores in your mouth. Your health care provider may tell you to use a special mouthwash or gel that does not contain alcohol, hydrogen peroxide, iodine, or thyme.

Other common side effects include:
- Infections
- Nausea and vomiting
- Diarrhea and constipation
- Swelling of your hands, arms, legs, and feet
- Joint pain
- Cough
- Skin problems (such as rash, acne, or dry skin)
- Fever
- Feeling tired
- Anxiety, aggression, and other abnormal behaviors
- Absence of menstrual periods (menstruation). You may miss one or more menstrual periods. Tell your health care provider if this happens
- Low red blood cells, white blood cells, or platelets
- Increased blood cholesterol level and certain other blood tests
- Increased blood sugar levels
- Decreased blood phosphate level

AFINITOR and AFINITOR DISPERZ may affect fertility in females and may affect your ability to become pregnant. Talk to your health care provider if this is a concern for you.

AFINITOR and AFINITOR DISPERZ may affect fertility in males and may affect your ability to father a child. Talk to your health care provider if this is a concern for you.

Tell your health care provider if you have any side effect that bothers you or does not go away.

These are not all the possible side effects of AFINITOR or AFINITOR DISPERZ. For more information, ask your health care provider or pharmacist. Call your doctor for medical advice about side effects.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

**WHAT IS THE MOST COMMON SIDE EFFECT?**

The most common side effect of AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) in treating patients with SEGA is mouth sores (also called ulcers), occurring in 62% of patients taking AFINITOR or AFINITOR DISPERZ. Before starting treatment, and during treatment, your doctor may offer some suggestions about proper oral care and what foods to avoid.

**DO**

- Eat soft foods (such as milkshakes, smoothies, pudding, yogurt, mashed potatoes, or bananas)
- Take good care of your mouth, and visit your dentist regularly
- Try to brush after every meal with a soft-bristled toothbrush and mild toothpaste

**DON’T**

- Don’t consume food and drinks that can irritate your mouth (such as citrus fruits and juices, tomatoes, spicy or salty foods, raw ginger, onions, and crunchy chips)
- Don’t use a mouthwash that contains alcohol, hydrogen peroxide, iodine, or thyme because it may irritate your mouth

Talk to your doctor right away if you have any questions or concerns. Your doctor or nurse may also provide you with a prescription treatment to help treat mouth sores.

SAFETY INFORMATION FOR AFINITOR AND AFINITOR DISPERZ

With AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension), you may have side effects. That’s why it is important to have frequent conversations with your doctor. You can make a management plan in case of side effects.

WHAT ARE THE MOST SERIOUS SIDE EFFECTS?

AFINITOR and AFINITOR DISPERZ can cause serious side effects. These serious side effects include:

- You may develop lung or breathing problems. In some people lung or breathing problems may be severe, and can even lead to death. Tell your health care provider right away if you have any of these symptoms: new or worsening cough, shortness of breath, chest pain, difficulty breathing, or wheezing.

- You may be more likely to develop an infection, such as pneumonia, or a bacterial, fungal, or viral infection. Viral infections may include active hepatitis B in people who have had hepatitis B in the past (reactivation). In some people these infections may be severe, and can even lead to death. You may need to be treated as soon as possible. Tell your health care provider right away if you have a temperature of 100.5°F or above, chills, or do not feel well. Symptoms of hepatitis B or infection may include the following: fever, chills, skin rash, joint pain and inflammation, tiredness, loss of appetite, nausea, pale stools, dark urine, yellowing of the skin, pain in the upper right side of the stomach.

Please see Important Safety Information throughout.

TIPS ABOUT COMMON SIDE EFFECTS OF AFINITOR:

Some people experience many side effects when taking AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension), while others have few. It can be helpful to keep track of your experience by writing it down in a journal.

• AFINITOR or AFINITOR DISPERZ works differently than treatments you may have had in the past, and it may cause side effects that you are not familiar with

• Tell your doctor if you have any side effect that bothers you or does not go away

• Your doctor or nurse may tell you to temporarily stop treatment until your symptoms improve, and then adjust your dose accordingly

• Your doctor may offer some suggestions about proper oral care and what foods to avoid

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

Please see Important Safety Information throughout. Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
TALKING WITH YOUR MEDICAL TEAM

We understand that being able to stay on treatment is important to you. This is why we recommend regular visits, screenings, and discussions with your medical team. Because TSC-related SEGA does not always have symptoms you can feel or see, these visits are important to any treatment plan.

Your doctor may adjust your dose to find the dosage strength of AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) that’s right for you. You should not change or adjust your dose by yourself. Always follow your doctor’s instructions, and contact your doctor or nurse if you are having any problems.

Call your doctor for medical advice about side effects. You may also report side effects to the FDA at 1-800-FDA-1088.

It may be helpful to keep track of your experience by writing it down in a journal.

Please see Important Safety Information throughout. Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
AFINITOR is available in two dosage forms, so there are additional options for you or your child. Your doctor will prescribe the form and dose of AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) that is right for you or your child.

Take AFINITOR or AFINITOR DISPERZ exactly as your doctor tells you to. Your doctor may change your dose of AFINITOR or AFINITOR DISPERZ or tell you to temporarily stop dosing, if needed.

**TAKE AS FOLLOWS:**

- Take AFINITOR or AFINITOR DISPERZ one time each day at about the same time
- Take AFINITOR or AFINITOR DISPERZ the same way each time, either with food or without food
- Take only AFINITOR or AFINITOR DISPERZ. Do not mix AFINITOR and AFINITOR DISPERZ together
- Use scissors to open the blister pack

Please see Important Safety Information throughout. Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
HOW TO TAKE AFINITOR OR AFINITOR DISPERZ (CONTINUED)

AFINITOR:
Swallow AFINITOR® (everolimus) Tablets whole with a glass of water. Do not crush, chew, or take if broken or crushed.

AFINITOR DISPERZ:
If your doctor prescribes AFINITOR DISPERZ™ (everolimus tablets for oral suspension) for you, see the “Instructions for Use” that come with your medicine for instructions on how to prepare and take your dose.

Each dose of AFINITOR DISPERZ must be prepared as a suspension before it is given.

AFINITOR DISPERZ can cause harm to an unborn baby. When possible, the suspension should be prepared by an adult who is not pregnant or planning to become pregnant.

Anyone who prepares suspensions of AFINITOR DISPERZ for another person should wear gloves to avoid possible contact with the medicine.

If you take too much AFINITOR or AFINITOR DISPERZ, contact your doctor or go to the nearest hospital emergency department right away. Take the pack of AFINITOR or AFINITOR DISPERZ with you.

Please see Important Safety Information throughout. Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
HOW TO TAKE AFINITOR OR AFINITOR DISPERZ (CONTINUED)

AVOID MISSING A DOSE

- If you miss a dose of AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension), you may still take it up to 6 hours after the time you normally take it. If it is more than 6 hours after you normally take your AFINITOR or AFINITOR DISPERZ, skip the dose for that day. The next day, take AFINITOR or AFINITOR DISPERZ at your usual time.
- Do not take 2 doses to make up for the one that you missed.
- If you are not sure about what to do, call your health care provider.

OTHER IMPORTANT THINGS YOU SHOULD KNOW

- Don’t drink grapefruit juice or eat grapefruit during your treatment with AFINITOR or AFINITOR DISPERZ. It may make the amount of AFINITOR or AFINITOR DISPERZ in your blood increase to a harmful level.
- Avoid the use of live vaccinations and contact with individuals who have received live vaccinations. If you are not sure about the type of vaccine, ask your health care provider.

Please see Important Safety Information throughout.
Click here for full Prescribing Information for AFINITOR or AFINITOR DISPERZ, including Patient Information.
You should have blood tests before you start AFINITOR® (everolimus) Tablets or AFINITOR DISPERZ™ (everolimus tablets for oral suspension) and throughout your treatment. These will include tests to check your blood cell count, liver function, kidney function, cholesterol, and blood sugar levels.
The AFINITRAC program is available to patients who have been prescribed AFINITOR® (everolimus) Tablets for TSC FDA-approved indications. An AFINITRAC Care Champion will provide you with one-on-one support to help ensure that you receive the ongoing resources and access you need.

**AFINITRAC® IS HERE TO HELP YOU STAY ON TRACK**

- Personalized support to help you track treatment, insurance needs, and much more
- A dedicated point of contact who provides the support you need
- Regular calls with your Care Champion to provide the support you need

You can call your Care Champion to ask questions and get assistance and support.

The AFINITRAC program does not provide medical treatment or medical advice. Calls with AFINITRAC Care Champions are not intended to take the place of care provided by your doctor.
